DETAILED ACTION

The title of the invention is not descriptive. A new title is required that is clearly indicative of the **invention** to which the claims are directed.

Rejections Under 35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 3, 4, and 8-11 the phrase "operated through a process for photographing..." is indefinite because the limitation is functional and the element(s) for performing the operation are not defined.

Claims 8-12 are rejected under 35 U.S.C. § 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2173.05(I). The omitted elements are: any element which performs the function of the phrase "wherein said optical apparatus is operated through a process for performing..." . Claims 1-7 provide for a processing unit.

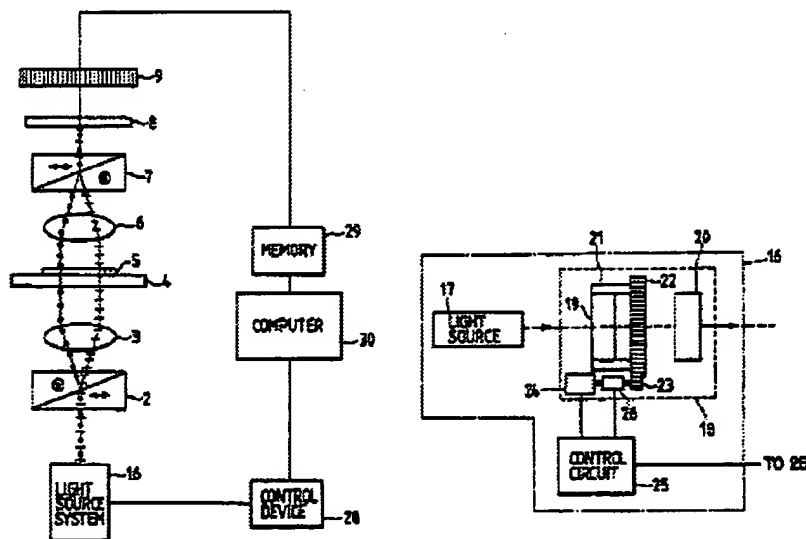

Rejections Under 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-11 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Tabata(5,420,717).

With regard to claims 8-11; the light source limitation is met by light source(17), the illumination optical system limitation is met by lens(3), the imaging optical system limitation is met by lens(6), the least one polarizing member limitation is met by Wollaston prism(2), the adjusting member limitation is met by adjustable half-wave plate(19), and the image pick-up member limitation is met by CCD array(9). The phrases "operated through a process for photographing..." and "wherein said optical apparatus is operated through a process for performing..." are functional and do not further limit the claimed apparatus.

Claim 12 is rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Dubois et al(Optics Letters). See figure 1.

With regard to claim 12; the light source limitation is met by the LED source; the illumination optical path limitation is met by the spherical lens, beam-splitter, and objective lens of the measurement path; the reference optical path limitation is met by the spherical lens, beam-splitter, and objective lens, and reference mirror of the reference path; and the image pick-up member limitation is met by the CCD camera. The phrase "wherein said optical apparatus is operated through a process for performing..." is functional and does not further limit the claimed apparatus.

Rejections Under Double Patenting

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17-21 of U.S. Patent No. 6,369,375. Although the conflicting claims are not identical, they are not patentably distinct from each other because while the claims of the "wherein said optical apparatus is operated through a process for performing..." are functional and do not further limit the claimed apparatus, 6,369,375 are broader in scope they include the same processing equations.
